Professional Summary

B.Tech Artificial Intelligence & Analytics student with strong foundations in **Java**, **Python**, **SQL**, **Object-Oriented Programming**, **Data Structures & Algorithms**, and full-stack web development. Hands-on experience building **scalable software** using **React**, **Node.js**, **Express.js**, **MongoDB**, and **REST APIs** during academic and internship projects. Skilled in **Git/GitHub**, **DBMS**, **SDLC**, debugging, and collaborative software development. Passionate about solving real-world problems through clean, efficient, and scalable code. Seeking a **Software Developer Internship**.

Technical Skills

Programming Languages: Java, JavaScript, Python, SQL, C
Computer Science Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, SDLC
Web Development: React.js, Node.js, Express.js, REST APIs, HTML, CSS
Databases: MySQL, MongoDB, Database Design
Tools: Git, GitHub, Postman, Jupyter Notebook, MS Excel, MS Word
Testing: Manual Testing, Functional Testing, Regression Testing, Smoke Testing, API Testing
Other: Algorithm Design, Debugging, Problem Solving, Version Control, Collaboration

Experience

Backend Engineer & Data Analyst Intern *Jun 2025 – Jul 2025*
Sakharam Kundlik Kodre Kutir Hospital, Remote

- Developed **REST APIs** using Node.js, Express.js, and MySQL for a Hospital Management System.
- Designed and optimized **SQL** queries for efficient database operations.
- Debugged backend modules and resolved application issues to improve reliability.
- Collaborated with developers using **Git** for version control and code review.
- Tested **REST APIs** using **Postman** to validate functionality and error handling.
- Participated throughout the **Software Development Life Cycle (SDLC)**, from implementation to testing and deployment.
- Improved backend performance by optimizing API response logic, and built Tableau dashboards from SQL/Python data analysis to support business insights.

Projects

UNCLUTTERED – Task Management System | *React, Node.js, Express.js, MongoDB* GitHub

- Developed a full-stack task management application with **JWT authentication** and **role-based access control**.
- Implemented **Kanban**-based workflow management for task creation, updates, and assignment.
- Designed **REST APIs** for task creation, updates, authentication, and user management.
- Integrated **MongoDB** for persistent data storage and **Git/GitHub** for version control.
- Performed **functional** and **regression testing** to ensure application reliability.

HotelEase – Hotel Management System | *React, Node.js, Express.js, MongoDB* GitHub

- Built a full-stack hotel management system covering booking, billing, and guest management modules.
- Designed and developed **RESTful APIs** for hotel operations and **MongoDB** schemas for efficient data management.
- Tested APIs using **Postman** and resolved backend bugs to improve reliability.
- Used **Git** and **GitHub** for version control and collaborative development.

ANN Human Activity Recognition | *Python, TensorFlow* GitHub

- Developed an **Artificial Neural Network (ANN)** using **TensorFlow** for human activity classification.
- Preprocessed and engineered datasets for model training.
- Implemented model evaluation using **accuracy, precision, and recall** metrics.
- Optimized hyperparameters to improve classification performance.

Education

MIT ADT University *Pune, India*
B.Tech. in Artificial Intelligence & Analytics | CGPA: **8.24/10**, Expected Graduation: 2027

Relevant Coursework

Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering, Artificial Intelligence

Certifications

PCAP: Programming Essentials in Python · Introduction to Data Science in Python · Tableau for Data Visualization and Analysis · Data Visualization in R using ggplot2 · Data Modeling in Power BI · C Programming – IIT Bombay
